

Please tick all
actions you would
support

COP26@Framlingham Survey

We are asking people what kind of climate actions they are in support of so we can focus on developing projects that mean the most to our community

EMISSIONS REDUCTION		Reducing our carbon footprint	
1 Initiatives to improve energy efficiency (e.g. insulation, double glazing) including listed buildings		4 Reducing car journeys - encourage local shopping, walk to school and car sharing schemes	
2 Installing publicly accessible electric vehicle charging points		5 Promoting community solar panel and heat pump purchase schemes	
3 Encouraging homes and businesses to switch to renewable electricity suppliers		6 Providing a thermal imaging camera free for residents to borrow to identify heat loss from homes	
BIODIVERSITY ENHANCEMENT		Making space for nature	
7 Calling for new buildings to 'make space for nature' by designing for natural plant and wildlife habitats		9 Ensuring that green space management boosts local wildlife and encourage local land owners to do the same	
8 Working to create linked green wildlife corridors through and around the town		10 Allocating land to native planting, wildlife habitats and re-wilding via the Neighbourhood Plan	
LEAST TRACE LIVING		Reducing waste & increasing re-use	
11 Having a bigger recycling centre on the edge of Fram for a wider range of materials		13 Aiming to get rid of all single use plastic (starting with bags & take away packaging)	
12 Encouraging swap and mend initiatives		14 Aiming to supply compostable bags at cost price, or free at point of use	
RESILIENCE		Reducing the risks of climate change	
15 Calling that new buildings and renovations are designed to reduce or store rainwater run-off		17 Encourage native tree planting to provide summer shading throughout the town	
16 Working to prevent unsustainable development on local flood plains		18 Exploring options for reducing the risk of overheating in buildings	
Do you have any comments or any other ideas we can consider?
